Symmetrical AWD	<p>Active Torque Split AWD with electronically managed variable hydraulic transfer clutch; continuously varies front-to-rear torque split based on inputs from acceleration, steering angle and yaw rate sensors; can proactively transfer more torque to rear wheels or in response to wheel slip.</p> <p>Exclusive to Wilderness model: advanced X-Mode system optimizes engine output and CVT ratio position, increases Active All-Wheel Drive engagement and uses enhanced control logic for the Vehicle Dynamics Control (VDC) system to reduce individual wheel spin to offer even more capability and control on slippery road surfaces and inclines; features Snow/Dirt mode, Deep Snow/Mud mode (under 25 mph); Deep Snow/Mud mode (above 25 mph); Low Speed / Low Ratio Gradient Control can automatically detect vehicle travel on steep gradients and shift to a CVT low ratio comprised of a lower transfer gear ratio and lower first ratio.</p>
